

For immediate release

Koehler Paper to Increase Prices for Carbonless, FineTech and Thermal Paper Globally by up to 10%, Effective January 1st

Oberkirch, Germany, 11/28/2023 – Koehler Paper, part of Koehler Group and leading manufacturer of Carbonless, FineTech and Thermal Paper, is announcing a price increase of up to 10% globally, effective January 1st of 2024.

Constantly increasing input costs remain challenging for the whole specialty paper industry. Pulp, chemicals, energy as well as labor costs are on a steady increase. At the same time, sales prices have been under pressure to a point where maintaining production and customer service becomes increasingly difficult. In order to remain a stable and reliable supplier of specialty papers, correcting prices is a necessary step for Koehler.

As always, Koehler's customers will be contacted directly by the sales team.

More about the Koehler Group

The Koehler Group was founded in 1807 and has been family-run to this day. The Group's core area of business is the development and production of high-quality, specialty paper, including thermal paper, playing card board, drink coasters, fine paper, carbonless paper, recycled paper, decor paper, wood pulp board, sublimation paper, and, since 2019, innovative specialty paper for the packaging industry, too. In Germany, the Koehler Group, with its around 2,500 employees, has five production sites, as well as three more in the USA. The Group operates on an international level, with an export ratio of more about 75% in 2022 and annual revenue of 1.3 billion euro.

As an energy-intensive enterprise, Koehler invests with its unit Koehler Renewable Energy in renewable energy projects such as wind energy, hydroelectric power, photovoltaics, and biomass. The Koehler Group has committed itself to producing more energy from renewable sources than is needed for paper production by 2030.

With the business unit Koehler Innovative Solutions, Koehler collaborates with start-ups to promote innovations in the core business areas of paper and renewable energy.
